Capital at risk. Past performance is not a guide to future performance.

The value of investments and any income from them can fall, this may in part be due to currency exchange rate fluctuations. Investors may get back less than invested.

Important information and risk warnings

The performance shown on this factsheet represents that of a model provided by Atlantic House Investments to its client the financial adviser. It should be taken as illustrative. To understand the performance achieved by an individual client the right source of information is the specific investment platform that produces the individual client valuation. This is because the exact replication of the portfolio across platforms, and how charges are levied, may vary and the platforms themselves are best placed to ensure that additional costs such as advisory and platform fees are properly included. This enables the investor to understand the individual cost of ownership and the specific fair value of the proposition to the individual client. The model launch date refers to the date this specific branded portfolio was launched on investment platform(s). Performance shown prior to this date is that of the investment strategy deployed by Albemarle Street Partners in an equivalent model of this risk profile. This performance should be taken as illustrative only.

Where the portfolio owns funds managed by Atlantic House Investments within the portfolio clients should be aware that a separate fee may be earned by the investment manager for the management of these funds. The performance may include a period of performance achieved by the equivalent portfolio prior to this branded portfolio being offered.

*The ongoing cost figure represents the cost of the management of the portfolio including underlying fund ongoing charges and discretionary management charge. Funds can also experience other costs associated with trading the underlying securities which may be disclosed separately on valuations. These are estimates however and no additional fee is earned in association with these charges. The source of this data is FactSet.

Key risks

It is the responsibility of the adviser to select the correct model appropriate for the client's time horizon and objective. Financial advisers must satisfy themselves that the funds' current asset allocations reflect the risk/return expectations of the funds when mapped. Albemarle's model portfolios are mapped against a selection of third-party risk profiling tools to aid advisers as part of suitability assessments for clients. The methodology and results of third-party risk profiling tools are not undertaken by Albemarle Street Partners.

Low Risk

This would be appropriate for an investor who is willing to take limited risk, where capital preservation is at the forefront of the investment strategy. The investor is willing to accept modest fluctuations in the value of their portfolio over the long-term.

© 2025 ASPIM All Rights Reserved. For the avoidance of doubt the discretionary fund manager of this portfolio is Atlantic House Investments Limited *The ongoing cost figure represents the cost of the management of the portfolio including underlying fund ongoing charges and discretionary management charge. Funds can also experience other costs associated with trading the underlying securities which may be disclosed separately on valuations. These are estimates however and no additional fee is earned in association with these charges. The source of this data is Factset. Fund performance is calculated bid to bid net of all charges with income reinvested at the payment date. The source for the performance data from inception until 1st October 2023 is Bloomberg, with anything following this date provided by Factset. Past performance is not a guide to future performance. The value of investments and any income from them can fall and you may get back less than you invested.
