Distribution and Target Market Strategy: The portfolio is suitable for retail, professional and eligible counterparty clients. Investment time horizon should be long term. Clients should have the capacity to tolerate loss and do not require capital protection or a guarantee. The portfolios can only be accessed through professional financial advisors. For further details on specific risk profiles, please contact the Albemarle Team.

*The ongoing cost figure represents the cost of the management of the portfolio including underlying fund ongoing charges and discretionary management charge. Funds can also experience other costs associated with trading the underlying securities which may be disclosed separately on valuations. These are estimates however and no additional fee is earned in association with these charges. The source of this data is FE Analytics.

Past performance is not a guide to future performance. The value of investments and any income from them can fall, this may in part be due to currency exchange rate fluctuations. Investors may get back less than invested.

GROWTH - FROM INCEPTION

3 May 2021 - 29 Mar 2024

Not all platforms have the same rebalance process and therefore there may be a variation in performance between platforms due to trading and settlement timescales.

Any regular income or drawdowns for retail clients may affect the rebalancing process of portfolios on certain platforms. Advisers must be aware of this and contact the platform in question if required.

The source of this data is Bloomberg for underlying fund prices, ASPIM for portfolio prices, FE for IA sector prices. Fund performance is calculated bid to bid net of all charges with income reinvested at the payment date. Past performance is not a guide to future performance. The value of investments and any income from them can fall, this may in part be due to currency exchange rate fluctuations. Investors may get back less than invested.

KEY RISKS

It is the responsibility of the adviser to select the correct model appropriate for the client's time horizon and objective. Financial advisers must satisfy themselves that the funds' current asset allocations reflect the risk/return expectations of the funds when mapped.

Albemarle's model portfolios are mapped against a selection of third-party risk profiling tools to aid advisers as part of suitability assessments for clients. The methodology and results of third-party risk profiling tools are not undertaken by Albemarle Street Partners.

Risk Profile: **High**

Risk Profile Definitions:

- Low: This would be appropriate for an investor who is willing to take limited risk, where capital preservation is at the forefront of the investment strategy. The investor is willing to accept modest fluctuations in the value of their portfolio over the long-term.
- Medium: This would be appropriate for an investor who is willing to take moderate risk to achieve their investment goals, achieving a capital return above inflation. The investor is willing to accept moderate fluctuations in the value of their portfolio over the long-term.
- High: This would be appropriate for an investor who is willing to accept a relatively high risk when investing in the pursuit of greater investment returns. The investor is willing to accept high fluctuations in the value of their portfolio over the long-term.
