MiFID cost	0.09%
Historical yield	2.96%
Total number of holdings (ex cash)	21
Investment time horizon	10-15 years. Minimum suggested investment term is five years
Launch date	2 Jun 2015

## OBJECTIVES AND POLICY

The Portfolio aims to provide capital growth and some income by investing in a diversified range of assets and markets worldwide. The Portfolio is benchmarked against the Investment Association Mixed Investment 20-60% Shares sector. The Portfolio will hold between 20% and 60% in equities and normally will have a volatility relative to the UK equity market of between 40% and 60%.

The Portfolio may invest up to 100% of its assets in collective investment schemes, exchange traded funds, closed ended investment schemes and real estate investment trusts, which themselves invest worldwide in any of the following: equities; bonds; and alternative assets. Alternative assets may include funds that use absolute return strategies or funds that invest in real estate, commodities or private equity. The Portfolio may also invest directly in equities, bonds and warrants, and hold cash. The Portfolio may use derivatives with the aim of reducing risk or managing the Portfolio more efficiently.

**Distribution and Target Market Strategy:** The portfolio is suitable for retail, professional and eligible counterparty clients. Investment time horizon should be long term. Clients should have the capacity to tolerate loss and do not require capital protection or a guarantee. The portfolios can only be accessed through professional financial advisors. For further details on specific risk profiles, please contact the Albemarle Team.

\*The ongoing cost figure represents the cost of the management of the portfolio including underlying fund ongoing charges and discretionary management charge. Funds can also experience other costs associated with trading the underlying securities which may be disclosed separately on valuations. These are estimates however and no additional fee is earned in association with these charges. The source of this data is FE Analytics.

Past performance is not a guide to future performance. The value of investments and any income from them can fall, this may in part be due to currency exchange rate fluctuations. Investors may get back less than invested.

## TOP 5 WEIGHTS BY ASSET

## BOTTOM 5 WEIGHTS BY ASSET

## KEY RISKS

It is the responsibility of the adviser to select the correct model appropriate for the client's time horizon and objective. Financial advisers must satisfy themselves that the funds' current asset allocations reflect the risk/return expectations of the funds when mapped.

Albemarle's model portfolios are mapped against a selection of third-party risk profiling tools to aid advisers as part of suitability assessments for clients. The methodology and results of third-party risk profiling tools are not undertaken by Albemarle Street Partners.

Risk Profile: **Medium**

Risk Profile Definitions:

- Low: This would be appropriate for an investor who is willing to take limited risk, where capital preservation is at the forefront of the investment strategy. The investor is willing to accept modest fluctuations in the value of their portfolio over the long-term.
- Medium: This would be appropriate for an investor who is willing to take moderate risk to achieve their investment goals, achieving a capital return above inflation. The investor is willing to accept moderate fluctuations in the value of their portfolio over the long-term.
- High: This would be appropriate for an investor who is willing to accept a relatively high risk when investing in the pursuit of greater investment returns. The investor is willing to accept high fluctuations in the value of their portfolio over the long-term.
